- Mr. Insel's outstanding academic success has provided him with a deep and thorough understanding of structural engineering principles, including dynamic seismic loading and response. In addition, Mr. Insel's internships in construction have provided him with an understanding and appreciation for the practical aspects of structural design and construction administration;
- Mr. Insel's advanced coursework included structural systems design, masonry design, composite design and seismic loading and design;
- Mr. Insel has demonstrated exceptional ability in the use of computer applications for structural engineering, including finite element programs such as ETABS and SAFE.
- Mr. Insel's project experience has included a variety of multi-storied residential, commercial and institutional projects.
